In Grade 2 my biggest wish was to take apart a floppy disk to figure out how it worked. Around the same time, around eight years old, I had a really old "computer" that hooked up to the TV and let you type in code, what I now know was BASIC, that would flash your name up on the screen. I badly wanted a cassette recorder to be able to save the program I had wrote out.

This curiosity with tech continued, when I was eleven I was downloading Linux distros from school to bring home and try to make a router out of, since we had high speed internet, but no router, and it's a small town, no tech stores. That's when I learned about, and am thankful I don't have to use much these days, `lsmod` and other gritty parts of Linux.

I am not trying to sell you on what I've done, since there has been so much I forget what to even mention until it is needed.

These resume is a horrible one-day Work in Progress, and the career site is more jumbly than I know. Site was started as a "one-pager" resume, but turned into a full website trying to organize and share my surprisingly many areas of expertise. Please accept this resume, with its placeholder/repeated content, as an outline of what I can do.

Also please know that until yesterday, I have not worked with Microsoft Publisher for ~20 years, when I was a teenager. I think it helps show my adaptability though, and quick learning abilities. Checkout https://career.stevens.pro/ for more.

Please call, I need a project and team to focus my energies on, rather than resume writing :) I write but really say nothing. Most my work is confidential, much under NDAs, and I can't just post about it here, but am able to discuss with you privately.

—- All the best, Greg

17+ Agency Years

IT Director at Media Dog Productions Inc. (www.mediadog.ca).

Boutique, Corporate, Largely Public Sector Websites.

Created, maintained, supported, fully managed web hosting service, a nice recurring revenue stream for our agency.

Business-ish Owner

Dalyle DevOps Inc, established October 2021. Business is good but I do not like billing, nor having additional customer support to service my clients, which is why I am seeking full-time employment, or full-time contract opportunities. Been advised that contracting may be only way to see as many tech stacks and make as much impact as possible.

DevOps, Cloud, IT

UX/UI, end-user Focused Eye

7+ Competitive Powerlifting Years

Brought me so much, from discipline to team work, community support, and more.

"...really knows his shit."

- Client, Jan. 2022

Kaizen (*My Way of Life*)

"a Japanese business philosophy of continuous improvement of working practices, personal efficiency, etc." — Oxford Languages, 2022-05-15

✓ **Success**

- **Top 5% Globally in Git (of 1.0M ppl who took it), HTML (of 2.6M), MySQL (of 3.7M), and PHP.**
- Top 15% Globally in Microsoft Outlook (of 3.7M) (swing and a meh).

Get to Know Me Video

It was made for Amazon, but applies to any organization receiving my application. Simply not enough savings in the bank to fiddle with video editing anymore.

www.dalyle.ca/awsvideo

GitHub Projects

- **Savvy Student Stats**
  - PowerBI Report w/. Data from Moodle's Mobile App REST API.
- **EQBank.ca Mapping for `csv2ofx`** (not my project, first OS contribution
  - Needed to convert bank transaction CSV into a format Quicken or Q\BO could import.

- **Static Site Generator, umm, sites?**
  - Forked from wonderful OS Contributors.
  - Check recent commits for examples of mine using the **Conventional Commits** standard and plugins.
